SUMMARY

Software Engineering student at the University of Hail, ranked 1st in cohort (GPA 3.968/4.00), with hands-on full-stack and AI development experience across academic and personal projects. Skilled in JavaScript, Python, React, and Node.js, with a focus on building and deploying practical, real-world applications. Seeking a Co-op to contribute strong technical and problem-solving skills to a collaborative engineering team.

EDUCATION

Bachelor of Software Engineering, *University of Hail*

- Overall GPA: 3.968 / 4.00 — Ranked 1st in cohort

EXPERIENCE

Co-op Intern — Saudi Aramco 06/2026 — Present

- Worked in the Digital & AI Center of Excellence, Autonomous Technologies, on an AI-powered patent search project.
- Improved search functionality and supported frontend development for internal AI projects.
- Led an Agentic AI hackathon team to build a Scope of Work generator.

Member — AI Club, University of Hail 02/2024 – 06/2025

- Participated in AI projects, technical discussions, workshops, and events with other club members.

PROJECTS

Nibras — AI-Powered University Chatbot

- Engineered a full-stack AI chatbot processing 448 academic PDF documents via Retrieval-Augmented Generation (RAG), enabling real-time student inquiry resolution.
- Designed RESTful APIs that process a knowledge base of 448 academic PDF documents to answer student inquiries in real time through a clean, responsive interface.
- Built a responsive React frontend integrated with a Node.js/Express backend and MongoDB Atlas, improving information accessibility for university students.

Spotter — Gym Workout & Progress Tracking

- Developed a cross-platform mobile application for iOS and Android, enabling users to log workouts, track strength progress, and monitor body measurements.
- Integrated an AI-powered coaching assistant using Supabase Edge Functions and the Claude API, delivering personalized workout recommendations and real-time progress insights within the app.
- Implemented clean UI/UX design principles and local data persistence, ensuring a smooth and reliable offline-first user experience.

Novelty Lens — AI-Powered Patent Search

- Built an AI-powered web application that helps users find and analyze patents related to their inventions.
- Developed a FastAPI backend that searches for relevant patents and provides clear summaries and recommendations.
- Created a responsive user interface with secure login and PostgreSQL-powered search history.

SKILLS

Technical Skills: Python, Java, JavaScript, SQL, React, Node.js, Express, MongoDB, HTML, CSS, Flutter, RESTful API design, Database Design, Object-Oriented Programming (OOP), Data Structures & Algorithms, Software Testing & Debugging, Data Analysis, Data Visualization, Artificial Intelligence & Machine Learning Fundamentals.

Tools: Git, GitHub, Visual Studio Code, Jupyter Notebook, Microsoft Excel, Microsoft Office.

Soft Skills: Problem Solving, Analytical Thinking, Team Collaboration, Communication, Time Management, Adaptability.

CERTIFICATES

- Microsoft Specialist
- Huawei HCIA-AI
- Software Development Using Python
- Data Science & AI
- Excel 2019 Associate
- Full Stack JavaScript

LANGUAGES

- English — Proficient
- Arabic — Native
